Global MDRS SOC Services

Aiuken
Cybersecurity

We have the market recognition by the rating companies' leaders confirming our commitment to quality, innovation and customer satisfaction

Aiuken Cybersecurity

Aiuken Cybersecurity is once again recognized by Gartner® in its 2024 Market Guide for Managed Detection and Response (MDRS)

Gartner

Our company strengths support us to continue being a trusted cybersecurity partner in the market
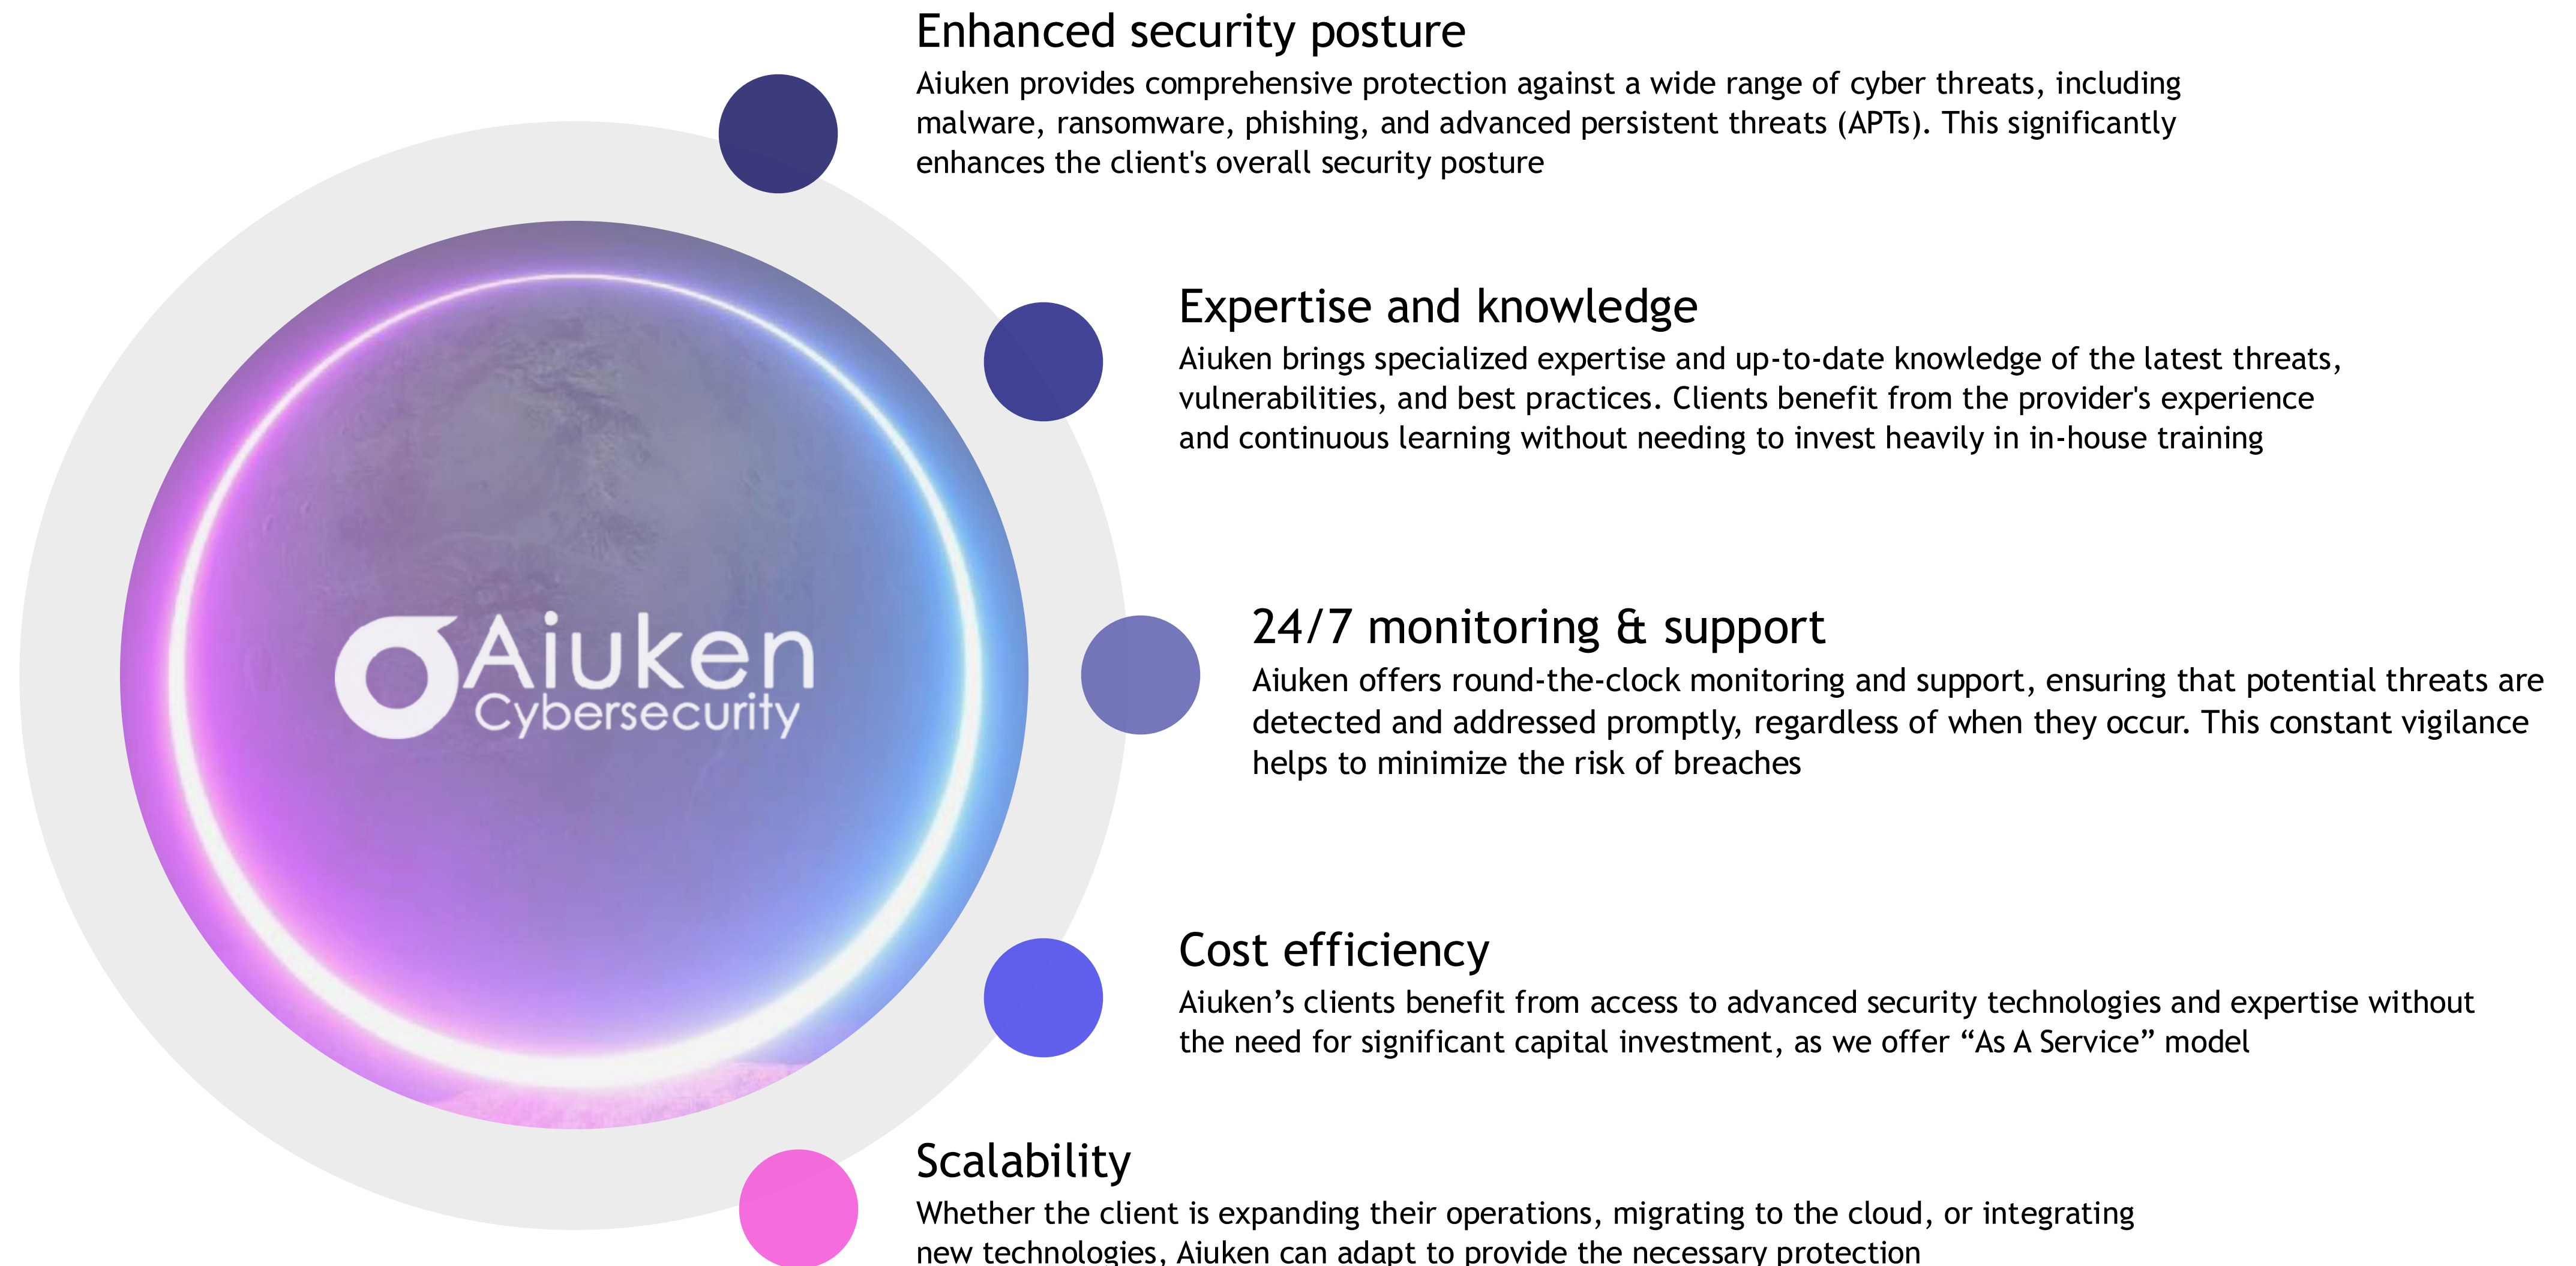

Strong R&D unique MDR proprietary platform

Leader in cloud SOC infrastructure for MS, AWS and Google

Managed SOC and response powered by AI

Enhanced security posture

Aiuken provides comprehensive protection against a wide range of cyber threats, including malware, ransomware, phishing, and advanced persistent threats (APTs). This significantly enhances the client's overall security posture

Expertise and knowledge

Aiuken brings specialized expertise and up-to-date knowledge of the latest threats, vulnerabilities, and best practices. Clients benefit from the provider's experience and continuous learning without needing to invest heavily in in-house training

24/7 monitoring & support

Aiuken offers round-the-clock monitoring and support, ensuring that potential threats are detected and addressed promptly, regardless of when they occur. This constant vigilance helps to minimize the risk of breaches

Cost efficiency

Aiuken's clients benefit from access to advanced security technologies and expertise without the need for significant capital investment, as we offer "As A Service" model

Scalability

Whether the client is expanding their operations, migrating to the cloud, or integrating new technologies, Aiuken can adapt to provide the necessary protection

Advantages of Aiuken' proprietary platform powered by AI:

1. Higher profitability due to the reduction of third parties' platform

1. Increases SOC Operations efficiency

1. Vendor agnostic

Automatic MITRE Classification
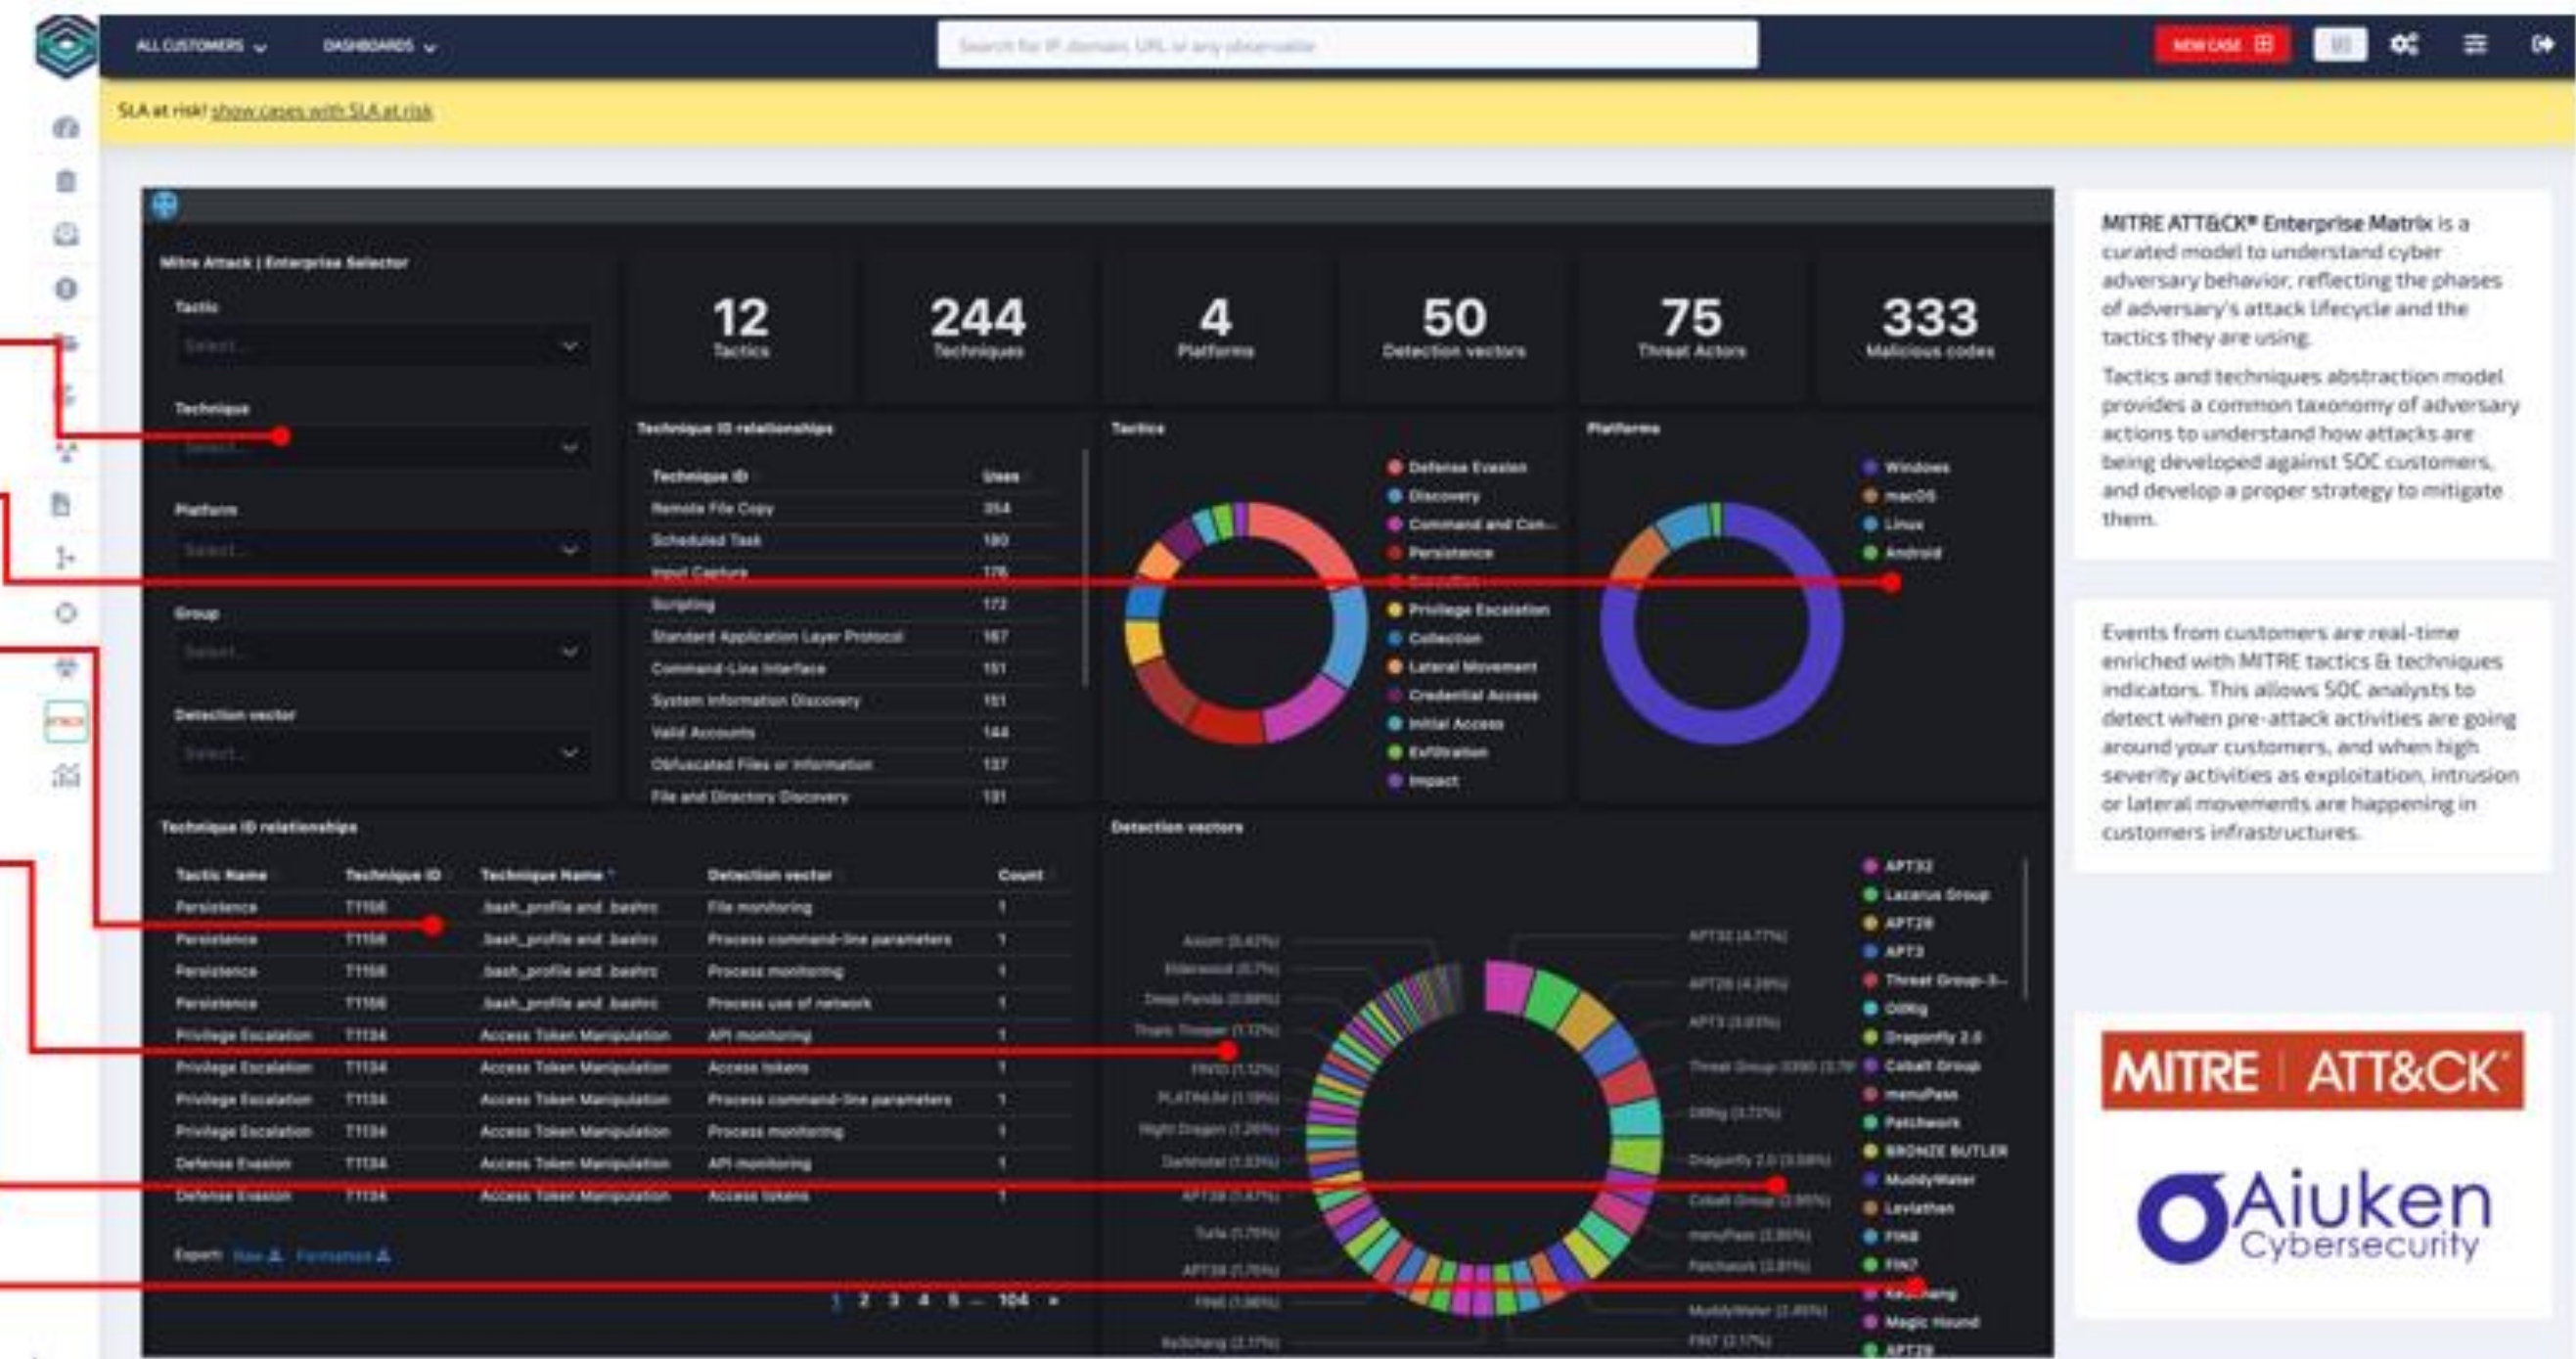

- Current attack phases
- Affected platforms
- Attack techniques
- Global threat actors, malware and tools
- Global operations
- Compliance controls

- Integrated Big Data visual analytics tool allows easy investigations
- Detection use cases are based on MITRE Enterprise matrix
- Information is presented as business KPIs and normalized language

Muchas Gracias
